MIRZA SHAHZAIB

Senior Python Data Engineer — Web Scraping & ETL Pipelines

Gujrat, Punjab, Pakistan • shahzaibmirza719@gmail.com • LinkedIn • GitHub

Open to remote, hybrid, on-site and relocation • English: professional working proficiency • Timezone: PKT (UTC+5)

SUMMARY

Senior Python data engineer with 5+ years building production web-scraping systems and ETL pipelines. Shipped 1,200+ scrapers and delivered 1,000+ freelance projects (Fiverr Level 2, 4.9 rating; Upwork Top Rated) across real estate, e-commerce, job-portal and lead-generation data, with long-running pipelines processing 100k+ records per day at a 98% success rate. Led a team of 7+ developers.

EXPERIENCE

Freelance Senior Data Engineer (Web Scraping) — Fiverr & Upwork | Dec 2021 – Present (alongside full-time role until Feb 2024)

- Delivered 1,000+ projects on Fiverr (450+ client reviews) and 100+ on Upwork, mostly one-time data extractions, for real estate, e-commerce, lead-generation and SaaS clients.
- Built scrapers for major platforms (Zillow, Rightmove, Amazon, Walmart, Indeed, Google Maps) and many client-specific sites, delivering millions of clean records as CSV, JSON and SQL for analytics and BI dashboards.
- Built and still maintain long-running pipelines, handling monitoring, retries, deduplication and fixes as target sites change, so clients receive fresh data without manual checks.
- Kept crawls reliable on protected, JavaScript-heavy sites with Playwright, proxy rotation, CAPTCHA handling and rate limiting.
- Automated reporting, API integrations and workflows with Python and n8n, cutting clients' manual work by up to 70%.
- Founded ScrapeByte (Feb 2023, part-time), a data-extraction and automation service, and lead its small technical team.

Software Engineer — GulzarSoft, Gujrat, Pakistan | Jan 2021 – Feb 2024

Senior Software Engineer / Team Lead (Jan 2023 – Feb 2024) • Associate Software Engineer (Aug 2022 – Dec 2022) • Python Developer (Jan 2021 – Jul 2022)

- Shipped 1,200+ production scrapers (Scrapy, BeautifulSoup, Selenium) that turn messy HTML into structured data, including 500 one-time extractions plus e-commerce and job-portal scrapers that I built and maintained long term.
- Designed end-to-end ETL pipelines that loaded millions of records into SQL and NoSQL databases and fed client-facing dashboards and BI tools.
- Built recrawl and monitoring logic so long-lived scrapers kept working as target sites changed.
- As Team Lead, led 7+ developers across real-estate and lead-generation pipelines, setting coding standards and reviewing every deliverable so projects shipped on time and at scale.

SELECTED PROJECTS

Rivery — API documentation extraction | Freelance client project, Jul – Dec 2024

- Built a system that detects site type (static vs. JavaScript-rendered), extracts full API documentation, converts it to structured Markdown and stores it on AWS S3 as clean training data for a pipeline-training model.

Seald App — large-scale scraping pipeline | Freelance client project, Mar – Apr 2024

- Designed a pipeline of 120+ custom scrapers across multiple sources, processing millions of records.

Long-term e-commerce client — 200+ scrapers | Freelance (Upwork), 2023

- Built and maintained the scrapers over a year-long partnership. Client testimonial: *"[Shahzaib] has been a partner for over a year now working on building and maintaining 200+ scrapers and integrating into my workflow … my go to partner for all scraping tasks. Highly recommended."* — Jonathan T., Global E-Commerce Manager (verified Upwork testimonial, 2023)

CODE SAMPLES (GITHUB)

- **job-board-scrapers** — incremental ZipRecruiter, Monster, Indeed and Glassdoor crawlers (Scrapy, SQLite dedupe, 39 tests, CI).
- **autoscout24-listings-pipeline** — scraper plus listing-expiry cleaner (Scrapy, MongoDB, build-id recovery, 24 tests, CI).

TECHNICAL SKILLS

Scraping & Crawling: Scrapy, Playwright, Selenium, BeautifulSoup, Requests, asyncio, proxy rotation, CAPTCHA handling, rate limiting

Data & Pipelines: Python, ETL design, pandas, SQL, PostgreSQL, MongoDB, deduplication, data cleaning and normalization, n8n

Cloud & DevOps: AWS S3, Docker, Git, CI/CD, Grafana, Sentry (scraper health alerting)

EDUCATION

BS in Computer Science — PMAS Arid Agriculture University, Gujrat Campus • 2017 – 2021
